PEDALING KAYAK

This double seated kayak is different from most other kayaks; it has two methods of propulsion. One is the traditional paddling. The second method is using a unique, fully adjustable, pedaling system. The pedals are alternately pushed back and forth with the feet and legs. With this movement the Penguin shaped flippers underneath the kayak makes a sweeping motion that drives the kayak forwards. The movement is swift and silent. Hands and arms can be at rest allowing you to go further and with less effort to get the most out of your experience.
