HAMEEDA THE HEN & RAAPPE THE ROOSTER

Hameeda, Raape and the family lives an amazing life here in the jungle of Siyam World. Plucking about living their best life!

Fun Fact: Roosters can usually be differentiated from hens by their striking plumage, marked by long flowing tails and bright pointed feathers on their necks. The rooster is larger and more brightly coloured than the hen, he also has a larger comb on top of his head.

WAHEEDA THE WHITE BREASTED WATERHEN

These cute birds feed on grass, shoots and worms. They breed usually between June and October

Fun Fact: Even though they are called Waterhen they are unable to swim. DON'T WORRY, our LIFE team always look out for them!

GURREY THE GECKO

George and his family are known for their cute appearance. They are harmless too! Their special talent is their ability to scurry along slick surfaces

Fun Fact: Geckos Are Able to Produce Various Sounds for Communication, Including Barks, Chirps, and Clicks

NADIYA THE KOEL

Koels can be found around your garden, in the trees. Koels eat fruits and insects and have a very distinctive call.

Fun Fact: Koel is a large cuckoo that feeds mainly on fruits and berries in trees, feasting on the ripe fruits. It also consumes insects and caterpillars.

SAIF THE STING RAY

Saif the sting ray is very popular, he graces us with his presence once in a while near the jetties.

Fun Fact: Stingrays give birth each year. They can have between 2 and 6 babies a year, each which can live between 15 and 25 years in the wild.

RAZZAQ THE EAGLE RAY

Razzaq is a beautiful creature that glides throughout our reefs and lagoon. Spot him while your snorkeling or canoeing

Fun Fact: A spotted eagle ray's pattern is unique to each individual, just like a fingerprint.
